Relevant Experience

Full Stack Web Developer | Automation

DXC Technology
Feb 2019 - Present | McKinley, Taguig PH

➤ Provided web solutions and services that generate revenue and cost savings by reducing client's manual processes, effort and operational time through automation.

➤ Designed, developed and built a central automation portal dashboard that solves client's business requirements and provides services to multiple role-based teams.

➤ Developed RESTful APIs that run installation scripts via Jenkins and Ansible.

➤ Maintained and managed the web app's database and server-side infrastructure.

➤ Developed and shipped UI table views for clients from project scripts results.

➤ Pioneered development of web services for our team's Automation services.
